HoD, Dept. of Arabic

## **About The Programme**

Islam is a universal religion. It asks us to bring people closer to Islam through good manners and civilized behavior. It also calls for people to live in peace and tranquility, regardless of religion or nationality, and to practice the principles of tolerance. It does not like to despise any other religion or condone oppression under any circumstances. That is why there are high examples of tolerance during the period when Muslims ruled in India. But, sometimes, it is seen that some people from other religion, due to their biased approach towards Muslims and Islam, seem to criticize Islamic teachings and do not hesitate to promote prejudice and oppression against Muslims and their civilized way of living. They not only consider Muslim (Ummah) community as conservative, but also try to create a negative atmosphere against them. These things are becoming common in other western countries as well, including India, while the country's constitution gives everyone full freedom to live freely and practice their religion. Keeping the current trends in view, this two-day international webinar is being organized to promote tolerance and harmony in our country in particular and in the world in general.

## **Objectives of The Conference**

- ❖ Promoting Peace and religious harmony in the society.
- ❖ Strengthening peaceful coexistence and communal harmony in the society.
- ❖ Calling people to accept cultural differences.
- ❖ Strengthening Interfaith dialogue.
